## ABOUT US

In Terra Software, we strive to provide digital efficiency to assist our clients in improving productivity. Through technological innovations, understanding of industry common practices, and adapting to clients' circumstances, we provide solutions tailor-made for our client to address their visible business concerns. On top of digitally facilitating processes for our clients, we take responsibility in transforming data collected into meaningful business metrics to help our clients make decisions to grow their business.

## WHO WE ARE

Terra Software was established in 2018 and has since evolved to serve clients across diverse industries, including manufacturing, retail, distribution, logistics, e-commerce, and finance. Our commitment to understanding industry best practices, combined with our remarkable adaptability, enables us to deliver tailor-made solutions that effectively address our clients' specific business challenges.

# SOFTWARE SOLUTION SERVICES

## Warehouse Management System

WMS is our core product which we have implemented for many of our clients. This solution is coupled with a web application, android application and industrial hardware such as tabletop scanners, mobile computers and barcode printers.

## Inventory Management System

Inventory Management System is a software solution designed to assist small and growing businesses in efficiently managing their inventory. It allows businesses to track inventory levels, tag items with barcode labels, and closely monitor the movements and changes within their inventory.

## Mobile Sales System

Mobile sales application is an application which is built for traveling sales person who sells products. It is a web-based application coupled with an android application to allow users to issue bills to customers via their smartphone and portable receipt printer.

## Barcode Labeling System

The Barcode Labeling System is a comprehensive solution that encompasses the entire labeling process, from label design to the seamless integration of barcode solutions. Our range of solutions includes leading options such as Loftware NiceLabel and Bartender.

## Customized Software

At Terra Software, we also provide customizable software solutions to fit business practices. Within our diverse pool of customers, we have experience in implementing systems in industries such as retail, distribution, warehousing and manufacturing
